

Intern study plans

2026.09.11

정수영

Goal

- **Establish curriculum for newcoming students**
 - collection of papers / notes / handouts
- Ability to understand group meetings
- Maximum 8 weeks * 1~2 hours
- 3 research topics (website):
 - S/TEM imaging
 - Material growth
 - Freestanding films

Subjects

- Microscopy
 - Basics (TEM vs STEM vs 4D-STEM)
 - STEM
 - Conventional imaging (HA/LAADF, BF, SAED, GPA, etc.)
 - Chemical analysis (EDX, EELS)
 - 4D-STEM
 - 4D-STEM pattern analysis
 - ptychography

- Materials & PLD

- ???
- Growth (deposition + transfer)
- Crystal structure (perovskite oxides)
- Properties (transport, response, capacitance, ferroicity, etc.)
- Specific materials

Plan?

- Paper presentation
- Short seminar by graduate students?
- Summarize into 1~2 pages of notes after session
